Canonical Ltd.
London, England

JOB REFERENCE: PYTHON ENGINEER

Dear Hiring Manager,

I am writing to express my keen interest in the Python Developer position at Canonical. As a passionate developer with extensive experience in Python and a strong commitment to open-source innovation, I am excited about the opportunity to contribute to Canonical's mission of transforming technology and empowering global communities through Ubuntu.

In my current role at Red Hat, I developed robust Python applications, improved features, and resolved critical issues, reducing application downtime by 15%. I also built scalable solutions, such as a distributed data processing pipeline, which reduced processing time by 40%. My expertise includes Python, Docker, SQL, and Linux, and I focus on producing well-documented, tested code.

Canonical's emphasis on technical excellence, collaboration, and community building resonates deeply with my professional ethos. I am particularly inspired by the opportunity to contribute to Ubuntu and other open-source projects, ensuring their reliability, scalability, and accessibility for millions worldwide. I look forward to the possibility of discussing how my experience aligns with the requirements of the role and how I can contribute to Canonical's continued success.

Thank you for considering my application. I am happy to provide further details or examples of my work upon request.

Sincerely,

Asad Ahmad Bajwa
